INDEX TO VOLUME XXIV

INDEX OF SUBJECTS

Adenomatoid tumors of the fallopian tube. (*Ragins and Crane:* July) . 933
Adenomatosis—Pulmonary . . . A report of three cases. (*Drymalski, Thompson, and Sweany:* September) 1083
Adrenal—Histologic studies on a virilizing tumor of the . . . . cortex. (*Weber and Menten:* March) 293
Albright's disease—The skeletal changes in . . . . (*MacMahon:* May) . 682*
Allergic hyperglobulinosis and hyalinosis (paramyloidosis) in the reticulo-endothelial system in Boeck's sarcoid and other conditions. A morphologic immunity reaction. (*Teilum:* March) . . 389
Allergy—Hyperglobulinemia, periarterial fibrosis of the spleen, and the wire loop lesion in disseminated lupus erythematosus in relation to allergic pathogenesis. (*Teilum:* March) 409
Alloxan—Effects of . . . upon function and structure of normal and neoplastic pancreatic islet cells in man. (*Conn and Hinerman:* March) 429
Alterations of cerebral capillaries in the early stage of arterial hypertension. (*Scheinker:* January) 211
American Association of Pathologists and Bacteriologists—Proceedings of the . . . . (May) 665
Amyloid—Atypical . . . disease, with observations on a new silver stain for . . . . (*King:* May, 671*; September) 1095
——Bone tumors composed of atypical . . . . (*Bauer and Kuzma:* May) . 690*
Androgens—Virilizing hilus cell tumors of the human ovary with a review of ovarian hilus cells and evidence of their androgenic function. (*Sternberg:* May) 679*
Aneurysm—True aneurysms of the mitral valve in subacute bacterial endocarditis. (*Saphir and Leroy:* January) 83
Antibody formation—Cellular changes in rabbits during . . . . I. Response to *Eberthella typhosa.* (*Mc Neil:* November) 1271
Anticholinesterase—The pathologic effects of two phosphine oxide anticholinesterases. (*Jones and Landing:* May) 722*
Aorta—Thrombotic (embolic) aortic occlusion. Its occurrence among mentally sick patients. (*Strassmann:* November) 1289
Argyrosis—Experimental . . . . IV. Morphologic changes in the experimental animal. (*Olcott:* July) 813
Arteries—Enlargement of the bronchial . . . and their anastomoses with the pulmonary . . . in chronic pulmonary disease. (*Liebow, Hales, and Lindskog:* May) 691*
Arteriovenous anastomosis—Vascular proliferations, with features of arteriovenous anastomoses, in the sympathetic chain of hypertensive patients. (*Lattes:* January) 177
Atypical amyloid disease, with observations on a new silver stain for amyloid. (*King:* May, 671*; September) 1095

Basic patterns in teratoid tumors of the testis. (*Moon and Hullinghorst:* September) 1067
Beryllium—The pneumonitis and granulomatosis peculiar to . . . workers. (*Dutra:* November) 1137
Beryllium pneumoconiosis. (*Jetter:* May) 690*
Biliary xanthomatosis (xanthomatous biliary cirrhosis). (*MacMahon:* May) 527
Blastomycosis—Paracoccidioidal granulomatosis. Cardiac localization in a case of generalized form. (*Cunha Motta:* March) 323
——Systemic North American . . . . Report of a case with cultural studies of the etiologic agent and observations on the effect of streptomycin and penicillin *in vitro.* (*Littman, Wicker, and Warren:* March) 339

*Abstract of paper presented at the meeting of The American Association of Pathologists and Bacteriologists held at the Jefferson Medical College, Philadelphia, March 12 and 13, 1948.

Blood and bone marrow in patients with cirrhosis of the liver. (*Berman and Axelrod:* May) 719*
Blood vessels—Alterations of cerebral capillaries in the early stage of arterial hypertension. (*Scheinker:* January) 211
——Lesions in elastic arteries associated with hypertension. (*Ashworth and Haynes:* January) 195
——Studies on periarteritis nodosa. III. The differentiation between the vascular lesions of periarteritis nodosa and of hypersensitivity. (*Zeek, Smith, and Weeter:* July) 889
——The fate of blood injected into the arterial media. (*Wartman:* May) 709*
——Vascular proliferations, with features of arteriovenous anastomoses, in the sympathetic chain of hypertensive patients. (*Lattes:* January) 177
Bone—Chondromyxoid fibroma of . . . . (*Lichtenstein:* May) 686*
——Development and pathognomonic evaluation of giant cells in . . . tumors and similar conditions. (*Levy:* May) 723*
——Ewing's tumor of . . . . (*Giffen:* May) 687*
——Fibrous dysplasia of the mandible and maxilla. (*Crane and Wolgamot:* May) 685*
——Heterotopic . . . formation in the skin. (*Stowell:* May) 728*
——Histochemical studies on cartilage and . . . . (*Follis and Berthrong:* May) 685*
——Hodgkin's granuloma involving . . . . (*Hazard:* May) 720*
——Neurofibromatosis and its relationship to certain diseases of . . . . (*Aegerter:* May) 684*
——Pathologic changes found in curettings from the head of the femur in 31 cases of osteochondritis deformans juvenilis (Legg-Calvé-Perthes' disease). (*Haythorn:* May) 684*
——Plasma cell myeloma associated with high concentration of plasma lipoprotein. (*Hill, Mulligan, and Dunlop:* May) 688*
——Skeletal effects of estrogenic hormone in growing vitamin C-depleted guinea-pigs. (*Silberberg and Silberberg:* September) . . . 1019
——Skeletal reflections of disordered metabolism. (*Jaffe:* May) . . . 682*
——The skeletal changes in Albright's disease. (*MacMahon:* May) . . 682*
Bone marrow—The blood and . . . in patients with cirrhosis of the liver. (*Berman and Axelrod:* May) 719*
Bone tumors composed of atypical amyloid. (*Bauer and Kuzma:* May) . 690*
Brain—Alterations of cerebral capillaries in the early stage of arterial hypertension. (*Scheinker:* January) 211
——The pathology of herpes simplex encephalitis in man, with a report of three cases. (*Haymaker:* May) 712*
——Transfer of immunity to the virus of St. Louis encephalitis to suckling mice through the milk, demonstrated by foster nursing. (*Smith and Geren:* May) 713*
Breast—See Mammary Gland.
Brown fat—Hibernoma. Report of case. (*Brines and Johnson:* May) . 675*
Brucellotic osteomyelitis of the spinal column in man. (*Lowbeer:* May) . 723*

Calcification—Hepatic and renal injury with calcium deposits and cirrhosis produced in rats by pyridine. (*Baxter:* May) 503
——Metastatic . . . produced in dogs by hypervitaminosis D and haliphagia. (*Mulligan and Stricker:* May) 451
Cancer—Gastric . . . : morphologic factors in five-year survival after gastrectomy. (*Steiner, Maimon, Palmer, and Kirsner:* September) . 947
Carcinoma—Enhancement of metastasis of a mouse mammary . . . following roentgen irradiation. (*Murphy and Kaplan:* May) . . 673*
——Histologic features of . . . of the cardio-esophageal junction and cardia. (*McPeak and Warren:* September) 971
——Obscure axillary lymph node metastasis in . . . . of the breast. (*Saphir and Amromin:* May) 726*

——The cytologic features of carcinomas as studied by direct smears. (*Hauptmann:* November) 1199
Cardiovascular lesions in acute poliomyelitis. (*Ludden and Edwards:* May) 714*
Carotid body—Tumors of the . . . . (*LeCompte:* March) 305
Cartilage—Histochemical studies on . . . and bone. (*Follis and Bethrong:* May) 685*
Cellular changes in rabbits during antibody formation. I. Response to *Eberthella typhosa.* (*McNeil:* November) 1271
Chicken—The microscopic study of lymphoid tissue in the pancreas and its relation to lymphomatosis in chickens. (*Lucas and Oakberg:* May) 699*
Choline—The effect of low protein and low . . . diets on the absorption of iron and copper. (*Hegsted, Kinney, and Cartaya:* May) . . . 722*
Chondromyxoid fibroma of bone. (*Lichenstein:* May) 686*
Cicatrizing enteritis (regional ileitis) as a pathologic entity. Analysis of one hundred and twenty cases. (*Warren and Sommers:* May) . . 475
Cirrhosis—See Liver.
Clinical and pathologic effects of the nitrogen and sulfur mustards in laboratory animals. (*Graef, Karnofsky, Jager, Krichesky, and Smith:* January) 1
Coccidioidomycosis in animals with report of a new case in a dog. (*Smith:* January) 223
Coliphage—Observations with improved electron microscopic technics on the internal structure of *Escherichia coli* cells and the generation of . . . . (*Hillier, Mudd, and Smith:* May) 715*
Colitis in the folic acid-deficient monkey with notes on similarities to ulcerative colitis in man. (*Rinehart and Greenberg:* May) . . . 710*
Color and precipitation reactions with malignant tumors. (*Weiss:* May) 673*
Congenital alveolar dysplasia of the lungs. (*MacMahon:* July) . . . 919
Congenital heart disease—The incidence of rheumatic heart disease in individuals with congenital malformations of the heart. (*Durlacher and Beyer:* May) 705*
Copper—The effect of low protein and low choline diets on the absorption of iron and . . . . (*Hegsted, Kinney, and Cartaya:* May) . . 722*
Cryptococcosis—Pathogenesis of cryptococcic (Torula) meningitis. (*Terplan:* May) 711*
Cytologic changes in thymic glands exposed in vivo to x-rays. (*Schrek:* September) 1055
Cytologic features of carcinomas as studied by direct smears. (*Hauptmann:* November) 1199
Cytologic studies with the phase microscope. I. The formation of "blisters" on cells in suspension (potocytosis), with observations on the nature of the cellular membrane. (*Zollinger:* May) 545
——II. The mitochondria and other cytoplasmic constituents under various experimental conditions. (*Zollinger:* May) 569
——III. Alterations in the nuclei of "resting" and dividing cells induced by means of fixatives, anisotonic solutions, acids, and alkali. (*Zollinger:* July) 797
——IV. Morphologic changes associated with the death of cells *in vitro* and *in vivo.* (*Zollinger:* September) 1039
Cytoplasmic inclusion bodies in intestinal epithelium of mice. Relation to diarrheal disease in sucklings. (*Pappenheimer and Cheever:* May) 718*

Development and pathognomonic evaluation of giant cells in bone tumors and similar conditions. (*Levy:* May) 723*
Dietary factor—The production of hemosiderosis of the liver in the rat by dietary means. (*Kinney, Hegsted, and Finch:* May) 699*
Differential diagnosis in congenital syphilis of the umbilical cord. (*Wanstrom and French:* May) 728*

Diffuse interstitial myocarditis in children. (*House:* November) . . 1235
Disseminated arteriolar and capillary platelet thromboses. (*Gore and Friedman:* May) 703*
Dog—Coccidioidomycosis in animals with report of a new case in a . . . . (*Smith:* January) 223
——Metastatic calcification produced in dogs by hypervitaminosis D and haliphagia. (*Mulligan and Stricker:* May) 451
Ductus arteriosus—The effect of patent . . . and of interauricular and interventricular septal defects on the development of pulmonary vascular lesions. (*Welch and Kinney:* July) 729
Dysplasia—Congenital alveolar . . . of the lungs. (*MacMahon:* July) . 919

Eberthella typhosa—Cellular changes in rabbits during antibody formation. I. Response to . . . . (*Mc Neil:* November) 1271
Effect of low protein and low choline diets on the absorption of iron and copper. (*Hegsted, Kinney, and Cartaya:* May) 722*
Effect of patent ductus arteriosus and of interauricular and interventricular septal defects on the development of pulmonary vascular lesions. (*Welch and Kinney:* July) 729
Effect of sulfathiazole upon experimental pyelonephritis in rabbits. (*Fisher and Toplack:* May) 720*
Effects of alloxan upon function and structure of normal and neoplastic pancreatic islet cells in man. (*Conn and Hinerman:* March) 429
Electron microscopy—Observations with improved electron microscopic technics on the internal structure of *Escherichia coli* cells and the generation of coliphage. (*Hillier, Mudd, and Smith:* May) . . . 715*
Encephalitis—The pathology of herpes simplex . . . in man, with a report of three cases. (*Haymaker:* May) 712*
——Transfer of immunity to the virus of St. Louis . . . to suckling mice through the milk, demonstrated by foster nursing. (*Smith and Geren:* May) 713*
Endocarditis—True aneurysms of the mitral valve in subacute bacterial . . . . (*Saphir and Leroy:* January) 83
Endometriosis—Experimental . . . . (*Ravid:* May) 726*
Enhancement of metastasis of a mouse mammary carcinoma following roentgen irradiation. (*Murphy and Kaplan:* May) 673*
Enlargement of the bronchial arteries and their anastomoses with the pulmonary arteries in chronic pulmonary disease. (*Liebow, Hales, and Lindskog:* May) 691*
Epithelium-like inclusions in the heart. (*Rabson and Thill:* May) . . 655
Escherichia coli—Observations with improved electron microscopic technics on the internal structure of . . . cells and the generation of coliphage. (*Hillier, Mudd, and Smith:* May) 715*
Esophagus—Histologic features of carcinoma of the cardio-esophageal junction and cardia. (*Mc Peak and Warren:* September) 971
Estrogens—Skeletal effects of estrogenic hormone in growing vitamin C-depleted guinea-pigs. (*Silberberg and Silberberg:* September) . 1019
Ewing's tumor of bone. (*Giffen:* May) 687*
Experimental argyrosis. IV. Morphologic changes in the experimental animal. (*Olcott:* July) 813
Experimental endometriosis. (*Ravid:* May) 726*

Factors influencing collagen content in experimental cirrhosis. (*Morrione:* May) 725*
Factors influencing the pathogenesis of experimental ovarian tumors in rats. (*Biskind, Pencharz, and Biskind:* May) 678*
Fallopian tube—Adenomatoid tumors of the . . . . (*Ragins and Crane:* July) 933
Fate of blood injected into the arterial media. (*Wartman:* May) . . . 709*
Femur—Pathologic changes found in curettings from the head of the . . . in 31 cases of osteochondritis deformans juvenilis (Legg-Calvé-Perthes' disease). (*Haythorn:* May) 684*

Fibrocystic disease—Relationship of . . . of the pancreas to a deficiency of secretin. (*Baggenstoss, Power, and Grindlay:* May) 692*
Fibroma—Chondromyxoid . . . of bone. (*Lichtenstein:* May) 686*
Fibrous dysplasia—The skeletal changes in Albright's disease. (*MacMahon:* May) 682*
Fibrous dysplasia of the mandible and maxilla. (*Crane and Wolgamot:* May) 685*
Folic acid—Colitis in the . . .-deficient monkey with notes on similarities to ulcerative colitis in man. (*Rinehart and Greenberg:* May) . . . 710*
Fulminating meningococcic infections and the so-called Waterhouse-Friderichsen syndrome. (*Ferguson and Chapman:* July) 763

Gargoylism—The pathology of . . . . Report of a case and review of the literature. (*Strauss:* July) 855
Gastric cancer: morphologic factors in five-year survival after gastrectomy. (*Steiner, Maimon, Palmer,* and *Kirsner:* September) . . . 947
Gastritis—The topography of chronic . . . in otherwise normal stomachs. (*Hebbel:* May) 721*
Giant cells—Development and pathognomonic evaluation of . . . in bone tumors and similar conditions. (*Levy:* May) 723*
Glomerulus—Structure of the . . . of the human kidney. (*McManus:* May, 725*; November) 1259
Granular cell "myoblastomas" and granular cell neurofibromas: separation of neurogenous tumors from the myoblastoma group. (*Fust and Custer:* May) 674*
Granuloma—Persistent "insect bites" (dermal eosinophilic granulomas) simulating lymphoblastomas, histiocytoses, and squamous cell carcinomas. (*Allen:* March) 367
Guinea-pig—Observations in guinea-pigs following injection of specific hematopoietic substances derived from beef liver. (*Meyer and Sawitsky:* July) 835
——Observations in guinea-pigs following injection of specific hematopoietic substances derived from urines of human leukemic subjects. (*Sawitsky and Meyer:* September) 1117
——Skeletal effects of estrogenic hormone in growing vitamin C-depleted guinea-pigs. (*Silberberg and Silberberg:* September) . . . 1019

Haliphagia—Metastatic calcification produced in dogs by hypervitaminosis D and . . . . (*Mulligan and Stricker:* May) 451
Heart—See also Endocarditis; Myocarditis.
——Cardiovascular lesions in acute poliomyelitis. (*Ludden and Edwards:* May) 714*
——Epithelium-like inclusions in the . . . . (*Rabson and Thill:* May) . 655
——Myocardial lesions in poliomyelitis. (*Dolgopol and Cragan:* May) . 713*
——Paracoccidioidal granulomatosis. Cardiac localization in a case of generalized form. (*Cunha Motta:* March) 323
——The effect of patent ductus arteriosus and of interauricular and interventricular septal defects on the development of pulmonary vascular lesions. (*Welch and Kinney:* July) 729
——The incidence of rheumatic . . . disease in individuals with congenital malformations of the . . . . (*Durlacher and Beyer:* May) . 705*
——Unexpected death in children with rheumatic . . . disease. (*Hamilton, Tanner, Pebley, and Voorhees:* May) 707*
Hematopoiesis—Hypersplenic extracts. An evaluation of their effects on the hematopoietic organs of mice. (*Platt:* May) 702*
Hematopoietic substances—Observations in guinea-pigs following injection of specific . . . derived from beef liver. (*Meyer and Sawitsky:* July) 835
——Observations in guinea-pigs following injection of specific . . . derived from urines of human leukemic subjects. (*Sawitsky and Meyer:* September). 1117

Hemoglobinuria—Studies on the pathogenesis of experimental hemoglobinuric nephrosis in rabbits with special reference to the late manifestations. (*Lalich:* May) 701*
Hemoglobinuria (blackwater fever) in the monkey with a consideration of the disease in man. (*Rigdon:* May) 701*
Hemorrhage—The fate of blood injected into the arterial media. (*Wartman:* May) 709*
Hemosiderosis—The production of . . . of the liver in the rat by dietary means. (*Kinney, Hegsted, and Finch:* May) 699*
Hemostasis—Platelet thrombosis in human . . . : a histologic study of skin wounds in normal and in purpuric individuals. (*Zucker:* May) 705*
Hepatic and renal injury with calcium deposits and cirrhosis produced in rats by pyridine. (*Baxter:* May) 503
Herpes simplex—The pathology of . . . encephalitis in man, with a report of three cases. (*Haymaker:* May) 712*
Herxheimer reaction—Morphologic changes in syphilitic lesions during the . . . . (*Sheldon and Heyman:* May) 727*
Heterotopic bone formation in the skin. (*Stowell:* May) 728*
Hibernoma. Report of case. (*Brines and Johnson:* May) 675*
Hilus cells—Virilizing hilus cell tumors of the human ovary with a review of ovarian . . . and evidence of their androgenic function. (*Sternberg:* May) 679*
Histochemical studies on cartilage and bone. (*Follis and Berthrong:* May) 685*
Histogenesis of myositis ossificans. (*Johnson:* May) 681*
Histologic and chemical study of necrosis of skeletal muscle in acute ischemia. (*Harman and Gwinn:* May) 720*
Histologic changes in rickettsialpox. (*Dolgopol:* January) 119
Histologic features of carcinoma of the cardio-esophageal junction and cardia. (*McPeak and Warren:* September) 971
Histologic lesions encountered in segmental enteritis. (*Rappaport, Burgoyne, and Smetana:* May) 725*
Histologic studies on a virilizing tumor of the adrenal cortex. (*Weber and Menten:* March) 293
Histopathologic observations in cases of Hodgkin's disease treated with nitrogen mustard. (*Cornell and Blauw:* May) 670*
Hodgkin's disease—A study of the behavior in tissue culture of lymph nodes from . . . . (*Rottino, Worken, and Hollender:* May) . . . 669*
——Histopathologic observations in cases of . . . treated with nitrogen mustard. (*Cornell and Blauw:* May) 670*
Hodgkin's granuloma involving bone. (*Hazard:* May) 720*
Hyperglobulinemia, periarterial fibrosis of the spleen, and the wire loop lesion in disseminated lupus erythematosus in relation to allergic pathogenesis. (*Teilum:* March) 409
Hypersensitivity—Studies on periarteritis nodosa. III. The differentiation between the vascular lesions of periarteritis nodosa and of . . . . (*Zeek, Smith, and Weeter:* July) 889
Hypersplenic extracts. An evaluation of their effects on the hematopoietic organs of mice. (*Platt:* May) 702*
Hypertension—Alterations of cerebral capillaries in the early stage of arterial . . . . (*Scheinker:* January) 211
——Lesions in elastic arteries associated with . . . . (*Ashworth and Haynes:* January) 195
——Vascular proliferations, with features of arteriovenous anastomoses, in the sympathetic chain of hypertensive patients. (*Lattes:* January) 177

Incidence of rheumatic heart disease in individuals with congenital malformations of the heart. (*Durlacher and Beyer:* May) . . . 705*
Inclusion bodies—Cytoplasmic . . in intestinal epithelium of mice. Relation to diarrheal disease in sucklings. (*Pappenheimer and Cheever:* May) 718*

"Insect bites"—Persistent . . . (dermal eosinophilic granulomas) simulating lymphoblastomas, histiocytoses, and squamous cell carcinomas. (*Allen:* March) 367
Intestine—Cicatrizing enteritis (regional ileitis) as a pathologic entity. Analysis of one hundred and twenty cases. (*Warren and Sommers:* May) 475
——Cytoplasmic inclusion bodies in intestinal epithelium of mice. Relation to diarrheal disease in sucklings. (*Pappenheimer and Cheever:* May) 718*
——Histologic lesions encountered in segmental enteritis. (*Rappaport, Burgoyne, and Smetana:* May) 725*
Iron—The effect of low protein and low choline diets on the absorption of . . . and copper. (*Hegsted, Kinney, and Cartaya:* May) . . . 722*
Irradiation—Cytologic changes in thymic glands exposed *in vivo* to x-rays. (*Schrek:* September) 1055
——Enhancement of metastasis of a mouse mammary carcinoma following roentgen . . . . (*Murphy and Kaplan:* May) 673*
Ischemia—A histologic and chemical study of necrosis of skeletal muscle in acute . . . . (*Harman and Gwinn:* May) 720*
Ischemic necrosis—The significance of local vascular phenomena in the production of . . . in skeletal muscle. (*Harman:* May) 625
Islet cell adenoma—Effects of alloxan upon function and structure of normal and neoplastic pancreatic islet cells in man. (*Conn and Hinerman:* March) 429

Kidney—Hepatic and renal injury with calcium deposits and cirrhosis produced in rats by pyridine. (*Baxter:* May) 503
——Hyperglobulinemia, periarterial fibrosis of the spleen, and the wire loop lesion in disseminated lupus erythematosus in relation to allergic pathogenesis. (*Teilum:* March) 409
——Sex difference in the alkaline phosphatase distribution in the . . . of the mouse. (*Dunn:* May) 719*
——Structure of the glomerulus of the human . . . . (*McManus:* May, 725*; November) 1259
——Studies on the pathogenesis of experimental hemoglobinuric nephrosis in rabbits with special reference to the late manifestations. (*Lalich:* May) 701*
——The periodic acid routine applied to the . . . . (*McManus:* May) . 643

Legg-Calvé-Perthes' disease—Pathologic changes found in curettings from the head of the femur in 31 cases of osteochondritis deformans juvenilis (. . .) . (*Haythorn:* May) 684*
Lesions in elastic arteries associated with hypertension. (*Ashworth and Haynes:* January) 195
Lesions of schistosomiasis japonica. (*Bracken, Bailey, and Thomas:* May) 611
Leukemia—Observations in guinea-pigs following injection of specific hematopoietic substances derived from beef liver. (*Meyer and Sawitsky:* July) 835
——Observations in guinea-pigs following injection of specific hematopoietic substances derived from urines of human leukemic subjects. (*Sawitsky and Meyer:* September) 1117
Lipodystrophy intestinalis (Whipple's disease). (*Black-Schaffer, Hendrix, and Handler:* May) 677*
Lipogranuloma—Sclerosing . . . . (*Smetana and Bernhard:* May) . . 675*
Lipoprotein—Plasma cell myeloma associated with high concentration of plasma . . . . (*Hill, Mulligan, and Dunlop:* May) 688*
Liver—Biliary xanthomatosis (xanthomatous biliary cirrhosis). (*MacMahon:* May) 527
——Factors influencing collagen content in experimental cirrhosis. (*Morrione:* May) 725*

——Hepatic and renal injury with calcium deposits and cirrhosis produced in rats by pyridine. (*Baxter:* May) 503
——Observations in guinea-pigs following injection of specific hematopoietic substances derived from beef . . . . (*Meyer and Sawitsky:* July) 835
——The blood and bone marrow in patients with cirrhosis of the . . . . (*Berman and Axelrod:* May). 719*
——The production of hemosiderosis of the . . . in the rat by dietary means. (*Kinney, Hegsted, and Finch:* May) 699*
Lung—Congenital alveolar dysplasia of the lungs. (*MacMahon:* July) . 919
——Enlargement of the bronchial arteries and their anastomoses with the pulmonary arteries in chronic pulmonary disease. (*Liebow, Hales,* and *Lindskog:* May) 691*
——Mucormycosis, with report of acute mycotic pneumonia. (*Baker and Severance:* May) 716*
——Production of unilateral ulcerative pulmonary phthisis by quantitative natural airborne contagion. (*Lurie and Abramson:* May) . . 694*
——Pulmonary adenomatosis. A report of three cases. (*Drymalski, Thompson, and Sweany:* September) 1083
——The effect of patent ductus arteriosus and of interauricular and interventricular septal defects on the development of pulmonary vascular lesions. (*Welch and Kinney:* July) 729
——The pneumonitis and granulomatosis peculiar to beryllium workers. (*Dutra:* November) 1137
——The pulmonary manifestations of scleroderma: an anatomic-physiologic correlation. (*Spain and Thomas:* May) 727*
——Tuberculosis in rabbits induced by droplet nuclei infection: response to initial infection and to reinfection. (*Ratcliffe and Wells:* May) 695*
Lupus erythematosus—Hyperglobulinemia, periarterial fibrosis of the spleen, and the wire loop lesion in disseminated . . . in relation to allergic pathogenesis. (*Teilum:* March) 409
Lymph nodes—A study of the behavior in tissue culture of . . . from Hodgkin's disease. (*Rottino, Worken, and Hollender:* May) . . . 669*
Lymphomatosis—The microscopic study of lymphoid tissue in the pancreas and its relation to . . . in chickens. (*Lucas and Oakberg:* May). 699*
Lymphosarcoma—Unusual changes in . . . under nitrogen mustard therapy. (*Hunter:* May) 670*

Malaria—Hemoglobinuria (blackwater fever) in the monkey with a consideration of the disease in man. (*Rigdon:* May) 701*
——Pathology of rupture of the spleen in acute vivax . . . . (*Lubitz:* May) 724*
Malleomyces pseudomallei—Melioidosis. Report of second case from the western hemisphere, with bacteriologic studies on both cases. (*Beamer, Varney, Brown, McDowell, and Eck:* May) 717*
Mammary gland—Enhancement of metastasis of a mouse mammary carcinoma following roentgen irradiation. (*Murphy and Kaplan:* May) 673*
——Obscure axillary lymph node metastasis in carcinoma of the breast. (*Saphir and Amromin:* May) 726*
Mandible—Fibrous dysplasia of the . . . and maxilla. (*Crane and Wolgamot:* May) 685*
Maxilla—Fibrous dysplasia of the mandible and . . . . (*Crane and Wolgamot:* May) 685*
Melanoblastoma—Pigmented nevus: factors of age and anatomical site. (*Lund and Stobbe:* May) 679*
Melanomas of childhood. (*Spitz:* May) 591
Melioidosis. Report of second case from the western hemisphere, with bacteriologic studies on both cases. (*Beamer, Varney, Brown, McDowell, and Eck:* May) 717*

Meningitis—Pathogenesis of cryptococcic (Torula) . . . . (*Terplan:* May) 711*
Meningococcemia—Fulminating meningococcic infections and the so-called Waterhouse-Friderichsen syndrome. (*Ferguson and Chapman:* July) 763
Metastasis—Enhancement of . . . of a mouse mammary carcinoma following roentgen irradiation. (*Murphy and Kaplan:* May) . . 673*
——Obscure axillary lymph node . . . in carcinoma of the breast. (*Saphir and Amromin:* May) 726*
Metastatic calcification produced in dogs by hypervitaminosis D and haliphagia. (*Mulligan and Stricker:* May) 451
Microscopic study of lymphoid tissue in the pancreas and its relation to lymphomatosis in chickens. (*Lucas and Oakberg:* May) 699*
Mitochondria—Cytologic studies with the phase microscope. II. The . . . and other cytoplasmic constituents under various experimental conditions. (*Zollinger:* May) 569
Monkey—Colitis in the folic acid-deficient . . . with notes on similarities to ulcerative colitis in man. (*Rinehart and Greenberg:* May) . . . 710*
——Hemoglobinuria (blackwater fever) in the . . . with a consideration of the disease in man. (*Rigdon:* May) 701*
Morphologic changes in syphilitic lesions during the Herxheimer reaction. (*Sheldon and Heyman:* May) 727*
Motor end-plates—Studies on ameboid motion and secretion of . . . . X. Effects of slow nervous action of disuse on the structure of nerve endings, neurosomes, and muscle fibers. (*Carey, Haushalter, Massopust, Garofalo, Lynch, Tabat, and Socoloff:* January) . . . 135
Mouse—Cytoplasmic inclusion bodies in intestinal epithelium of mice. Relation to diarrheal disease in sucklings. (*Pappenheimer and Cheever:* May) 718*
——Enhancement of metastasis of a . . . mammary carcinoma following roentgen irradiation. (*Murphy and Kaplan:* May) 673*
——Hypersplenic extracts. An evaluation of their effects on the hematopoietic organs of mice. (*Platt:* May) 702*
——Sex differences in the alkaline phosphatase distribution in the kidney of the . . . . (*Dunn:* May) 719*
——Transfer of immunity to the virus of St. Louis encephalitis to suckling mice through the milk, demonstrated by foster nursing. (*Smith and Geren:* May) 713*
Mucormycosis, with report of acute mycotic pneumonia. (*Baker and Severance:* May) 716*
Muscle—A histologic and chemical study of necrosis of skeletal . . . in acute ischemia. (*Harman and Gwinn:* May) 720*
——Histogenesis of myositis ossificans. (*Johnson:* May) 681*
——The significance of local vascular phenomena in the production of ischemic necrosis in skeletal . . . .(*Harman:* May) 625
Mycobacterium tuberculosis—Serologic reactions of patients with sarcoidosis to antigens of . . . . (*Carnes and Raffel:* May) . . . 697*
Mycobacterium tuberculosis, type avium—Pathogenicity studies of tubercle bacilli, type avium, from a human infection. (*Feldman, Hutchinson, Schwarting, and Karlson:* May) 696*
Myoblastoma—Granular cell "myoblastomas" and granular cell neurofibromas: separation of neurogenous tumors from the . . . group. (*Fust and Custer:* May) 674*
Myocardial lesions in poliomyelitis. (*Dolgopol and Cragan:* May) . . 713*
Myocarditis—Diffuse interstitial . . . in children. (*House:* November) . 1235
——Virus . . . . Pathologic and experimental studies. (*Schmidt:* January) 97
Myositis ossificans—Histogenesis of . . . . (*Johnson:* May) 681*

Necrosis—A histologic and chemical study of . . . of skeletal muscle in acute ischemia. (*Harman and Gwinn:* May) 720*

——Cytologic studies with the phase microscope. IV. Morphologic changes associated with the death of cells *in vitro* and *in vivo*. (*Zollinger:* September) 1039
——The significance of local vascular phenomena in the production of ischemic . . . in skeletal muscle. (*Harman:* May) 625
Neoplasm—See also under anatomical location concerned.
——Color and precipitation reactions with malignant tumors. (*Weiss:* May) 673*
Nephrosis—Studies on the pathogenesis of experimental hemoglobinuric . . . in rabbits with special reference to the late manifestations. (*Lalich:* May) 701*
Neurofibroma—Granular cell "myoblastomas" and granular cell neurofibromas: separation of neurogenous tumors from the myoblastoma group. (*Fust and Custer:* May) 674*
Neurofibromatosis and its relationship to certain diseases of bone. (*Aegerter:* May) 684*
Nevus—Pigmented . . .: factors of age and anatomical site. (*Lund and Stobbe:* May) 679*
Nitrogen mustard—Histopathologic observations in cases of Hodgkin's disease treated with . . . . (*Cornell and Blauw:* May) 670*
——Studies on the mechanism of action of the nitrogen and sulfur mustards *in vivo*. (*Karnofsky, Graef, and Smith:* March) . . . 275
——The clinical and pathologic effects of the nitrogen and sulfur mustards in laboratory animals. (*Graef, Karnofsky, Jager, Kirchesky, and Smith:* January) 1
——Unusual changes in lymphosarcoma under . . . therapy. (*Hunter:* May) 670*
Nuclear alterations—Cytologic studies with the phase microscope. III. Alterations in the nuclei of "resting" and dividing cells induced by means of fixatives, anisotonic solutions, acids, and alkali. (*Zollinger:* July) 797

Obscure axillary lymph node metastasis in carcinoma of the breast. (*Saphir and Amromin:* May) 726*
Observations in guinea-pigs following injection of specific hematopoietic substances derived from beef liver. (*Meyer and Sawitsky:* July) 835
Observations in guinea-pigs following injection of specific hematopoietic substances derived from urines of human leukemic subjects. (*Sawitsky and Meyer:* September) 1117
Observations with improved electron microscopic technics on the internal structure of *Escherichia coli* cells and the generation of coliphage. (*Hillier, Mudd, and Smith:* May) 715*
Osteochondritis deformans juvenilis—Pathologic changes found in curettings from the head of the femur in 31 cases of . . . (Legg-Calvé-Perthes' disease). (*Haythorn:* May) 684*
Osteomyelitis—Brucellotic . . . of the spinal column in man. (*Lowbeer:* May) 723*
Ovary—Factors influencing the pathogenesis of experimental ovarian tumors in rats. (*Biskind, Pencharz, and Biskind:* May) 678*
——Virilizing hilus cell tumors of the human . . . with a review of ovarian hilus cells and evidence of their androgenic function. (*Sternberg:* May) 679*

Pancreas—Effects of alloxan upon function and structure of normal and neoplastic pancreatic islet cells in man. (*Conn and Hinerman:* March) 429
——Relationship of fibrocystic disease of the . . . to a deficiency of secretin. (*Baggenstoss, Power, and Grindlay:* May) 692*
——The microscopic study of lymphoid tissue in the . . . and its relation to lymphomatosis in chickens. (*Lucas and Oakberg:* May) . . . 699*

Pancreas in uremia: a histopathologic study. (*Baggenstoss:* September) 1003
Paracoccidioidal granulomatosis. Cardiac localization in a case of generalized form. (*Cunha Motta:* March) 323
Paragangliomas. Review of subject and report of five original cases. (*Brines and Jennings:* November) 1167
Paramyloidosis—Allergic hyperglobulinosis and hyalinosis (. . .) in the reticulo-endothelial system in Boeck's sarcoid and other conditions. A morphologic immunity reaction. (*Teilum:* March) 389
Pathogenesis of cryptococcic (Torula) meningitis. (*Terplan:* May) . . 711*
Pathogenicity studies of tubercle bacilli, type avium, from a human infection. (*Feldman, Hutchinson, Schwarting, and Karlson:* May) . 696*
Pathologic changes found in curettings from the head of the femur in 31 cases of osteochondritis deformans juvenilis (Legg-Calvé-Perthes' disease). (*Haythorn:* May) 684*
Pathologic effects of two phosphine oxide anticholinesterases. (*Jones and Landing:* May) 722*
Pathology of amino acid deficiency in rats. I. Phenylalanine deficiency. (*Ferguson and Schwartz:* May) 709*
Pathology of gargoylism. Report of a case and review of the literature. (*Strauss:* July) 855
Pathology of herpes simplex encephalitis in man, with a report of three cases. (*Haymaker:* May) 712*
Pathology of rupture of the spleen in acute vivax malaria. (*Lubitz:* May) 724*
Pathology of secondary shock. (*Moon:* March) 235
Periarteritis nodosa—Studies on . . . . III. The differentiation between the vascular lesions of . . . and of hypersensitivity. (*Zeek, Smith, and Weeter:* July) 889
Periodic acid routine applied to the kidney. (*McManus:* May) . . . 643
Periodic acid-Schiff's reagent technic—Structure of the glomerulus of the human kidney. (*McManus:* May, 725*; November) . . . 1259
Persistent "insect bites" (dermal eosinophilic granulomas) simulating lymphoblastomas, histiocytoses, and squamous cell carcinoma. (*Allen:* March) 367
Phase microscope—Cytologic studies with the . . . . I. The formation of "blisters" on cells in suspension (potocytosis), with observations on the nature of the cellular membrane. (*Zollinger:* May) . . . 545
——Cytologic studies with the . . . . II. The mitochondria and other cytoplasmic constituents under various experimental conditions. (*Zollinger:* May) 569
——Cytologic studies with the . . . . III. Alterations in the nuclei of "resting" and dividing cells induced by means of fixatives, anisotonic solutions, acids, and alkali. (*Zollinger:* July) 797
——Cytologic studies with the . . . . IV. Morphologic changes associated with the death of cells *in vitro* and *in vivo*. (*Zollinger:* September) 1039
Phenylalanine—Pathology of amino acid deficiency in rats. I. . . . deficiency. (*Ferguson and Schwartz:* May) 709*
Phosphatase—Sex difference in the alkaline . . . distribution in the kidney of the mouse. (*Dunn:* May) 719*
Phosphine oxide—The pathologic effects of two . . . anticholinesterases. (*Jones and Landing:* May) 722*
Pigmented nevus: factors of age and anatomical site. (*Lund and Stobbe:* May) 679*
Plasma cell myeloma associated with high concentration of plasma lipoprotein. (*Hill, Mulligan, and Dunlop:* May) 688*
Platelet thromboses—Disseminated arteriolar and capillary . . . . (*Gore and Friedman:* May) 703*
Platelet thrombosis in human hemostasis: a histologic study of skin wounds in normal and in purpuric individuals. (*Zucker:* May) . . 705*
Pneumoconiosis—Beryllium . . . . (*Jetter:* May) 690*

Pneumonia—Mucormycosis, with report of acute mycotic . . . . (*Baker and Severance:* May) 716*
Pneumonitis and granulomatosis peculiar to beryllium workers. (*Dutra:* November) 1137
Poliomyelitis—Cardiovascular lesions in acute . . . . (*Ludden and Edwards:* May) 714*
——Myocardial lesions in . . . . (*Dolgopol and Cragan:* May) . . . 713*
Potocytosis—Cytologic studies with the phase microscope. I. The formation of "blisters" on cells in suspensions (. . .), with observations on the nature of the cellular membrane. (*Zollinger:* May) . . 545
Proceedings—See American Association of Pathologists and Bacteriologists.
Production of hemosiderosis of the liver in the rat by dietary means. (*Kinney, Hegsted, and Finch:* May) 699*
Production of unilateral ulcerative pulmonary phthisis by quantitative natural airborne contagion. (*Lurie and Abramson:* May) . . . 694*
Protein—The effect of low . . . and low choline diets on the absorption of iron and copper. (*Hegsted, Kinney, and Cartaya:* May) 722*
Pulmonary adenomatosis. A report of three cases. (*Drymalski, Thompson, and Sweany:* September) 1083
Pulmonary manifestations of scleroderma: an anatomic-physiologic correlation. (*Spain and Thomas:* May) 727*
Pyridine—Hepatic and renal injury with calcium deposits and cirrhosis produced in rats by . . . . (*Baxter:* May) 503

Rabbit—Cellular changes in rabbits during antibody formation. I. Response to *Eberthella typhosa.* (*Mc Neil:* November) 1271
——Studies on the pathogenesis of experimental hemoglobinuric nephrosis in rabbits with special reference to the late manifestations. (*Lalich:* May) 701*
——Tuberculosis in rabbits induced by droplet nuclei infection: response to initial infection and to reinfection. (*Ratcliffe and Wells:* May) 695*
Rat—Factors influencing the pathogenesis of experimental ovarian tumors in rats. (*Biskind, Pencharz, and Biskind:* May) 678*
——Hepatic and renal injury with calcium deposits and cirrhosis produced in rats by pyridine. (*Baxter:* May) 503
——Pathology of amino acid deficiency in rats. I. Phenylalanine deficiency. (*Ferguson and Schwartz:* May) 709*
——The production of hemosiderosis of the liver in the . . . by dietary means. (*Kinney, Hegsted, and Finch:* May) 699*
Regional ileitis—Cicatrizing enteritis (. . .) as a pathologic entity. Analysis of one hundred and twenty cases. (*Warren and Sommers:* May) 475
Relationship of fibrocystic disease of the pancreas to a deficiency of secretin. (*Baggenstoss, Power, and Grindlay:* May) 692*
Reticulo-endothelium—Allergic hyperglobulinosis and hyalinosis (paramyloidosis) in the reticulo-endothelial system in Boeck's sarcoid and other conditions. A morphologic immunity reaction. (*Teilum:* March) 389
Rheumatic heart disease—The incidence of . . . in individuals with congenital malformations of the heart. (*Durlacher and Beyer:* May) . 705*
——Unexpected death in children with . . . . (*Hamilton, Tanner, Pebley, and Voorhees:* May) 707*
Rickettsialpox—Histologic changes in . . . . (*Dolgopol:* January) . . 119

Sarcoidosis—Allergic hyperglobulinosis and hyalinosis (paramyloidosis) in the reticulo-endothelial system in Boeck's sarcoid and other conditions. A morphologic immunity reaction. (*Teilum:* March) . . 389
——Serologic reactions of patients with . . . to antigens of *Mycobacterium tuberculosis.* (*Carnes and Raffel:* May) 697*

Schistosomiasis—The lesions of . . . japonica. (*Bracken, Bailey, and Thomas:* May) 611
Scleroderma—The pulmonary manifestations of . . . : an anatomic-physiologic correlation. (*Spain and Thomas:* May) 727*
Sclerosing lipogranuloma. (*Smetana and Bernhard:* May) 675*
Secretin—Relationship of fibrocystic disease of the pancreas to a deficiency of . . . . (*Baggenstoss, Power, and Grindlay:* May) . . . 692*
Segmental enteritis—Histologic lesions encountered in . . . . (*Rappaport, Burgoyne, and Smetana:* May) 725*
Septal defects—The effect of patent ductus arteriosus and of interauricular and interventricular . . . on the development of pulmonary vascular lesions. (*Welch and Kinney:* July) 729
Serologic reactions of patients with sarcoidosis to antigens of *Mycobacterium tuberculosis.* (*Carnes and Raffel:* May) 697*
Sex difference in the alkaline phosphatase distribution in the kidney of the mouse. (*Dunn:* May) 719*
Shock—The pathology of secondary . . . . (*Moon:* March) 235
Significance of local vascular phenomena in the production of ischemic necrosis in skeletal muscle. (*Harman:* May) 625
Silicosis—Some aspects of the evolution of silicotic lesions. (*Costero:* January) 49
Silver stain—Atypical amyloid disease, with observations on a new . . . for amyloid. (*King:* May, 671*; September) 1095
Skeletal changes in Albright's disease. (*MacMahon:* May) 682*
Skeletal effects of estrogenic hormone in growing vitamin C-depleted guinea-pigs. (*Silberberg and Silberberg:* September) 1019
Skeletal reflections of disordered metabolism. (*Jaffe:* May) 682*
Skin—Heterotopic bone formation in the . . . . (*Stowell:* May) . . . 728*
——Persistent "insect bites" (dermal eosinophilic granulomas) simulating lymphoblastomas, histiocytoses, and squamous cell carcinomas. (*Allen:* March) 367
Some aspects of the evolution of silicotic lesions. (*Costero:* January) . 49
Spine—Brucellotic osteomyelitis of the spinal column in man. (*Lowbeer:* May) 723*
Spleen—Hyperglobulinemia, periarterial fibrosis of the . . . , and the wire loop lesion in disseminated lupus erythematosus in relation to allergic pathogenesis. (*Teilum:* March) 409
——Hypersplenic extracts. An evaluation of their effects on the hematopoietic organs of mice. (*Platt:* May) 702*
——Pathology of rupture of the . . . in acute vivax malaria. (*Lubitz:* May) 724*
Stomach—Gastric cancer: morphologic factors in five-year survival after gastrectomy. (*Steiner, Maimon, Palmer, and Kirsner:* September) . 947
——Histologic features of carcinoma of the cardio-esophageal junction and cardia. (*McPeak and Warren:* September) 971
——The topography of chronic gastritis in otherwise normal stomachs. (*Hebbel:* May) 721*
Structure of the glomerulus of the human kidney. (*McManus:* May, 725*; November) 1259
Studies on ameboid motion and secretion of motor end-plates. X. Effects of slow nervous action of disuse on the structure of nerve endings, neurosomes, and muscle fibers. (*Carey, Haushalter, Massopust, Garofalo, Lynch, Tabat, and Socoloff:* January) . . . 135
Studies on periarteritis nodosa. III. The differentiation between the vascular lesions of periarteritis nodosa and of hypersensitivity. (*Zeek, Smith, and Weeter:* July) 889
Studies on the mechanism of action of the nitrogen and sulfur mustards *in vivo.* (*Karnofsky, Graef, and Smith:* March) 275
Studies on the pathogenesis of experimental hemoglobinuric nephrosis in rabbits with special reference to the late manifestations. (*Lalich:* May) 701*

Study of the behavior in tissue culture of lymph nodes from Hodgkin's disease. *Rottino, Worken, and Hollender:* May) 669*
Sulfur mustards—Studies on the mechanism of action of the nitrogen and . . . *in vivo.* (*Karnofsky, Graef, and Smith:* March) 275
——The clinical and pathologic effects of the nitrogen and . . . in laboratory animals. (*Graef, Karnofsky, Jager, Krichesky, and Smith:* January) 1
Syphilis—Differential diagnosis in congenital . . . of the umbilical cord. (*Wanstrom and French:* May) 728*
——Morphologic changes in syphilitic lesions during the Herxheimer reaction. (*Sheldon and Heyman:* May) 727*
Systemic North American blastomycosis. Report of a case with cultural studies of the etiologic agent and observations on the effect of streptomycin and penicillin *in vitro.* (*Littman, Wicker, and Warren:* March). 339

Teratoma—Basic patterns in teratoid tumors of the testis. (*Moon and Hullinghorst:* September) 1067
Testis—Basic patterns in teratoid tumors of the . . . . (*Moon and Hullinghorst:* September). 1067
Thrombosis—Disseminated arteriolar and capillary platelet thromboses. (*Gore and Friedman:* May) 703*
——Platelet . . . in human hemostasis: a histologic study of skin wounds in normal and in purpuric individuals. (*Zucker:* May) . . 705*
Thrombotic (embolic) aortic occlusion. Its occurrence among mentally sick patients. (*Strassmann:* November) 1289
Thymus—Cytologic changes in thymic glands exposed *in vivo* to x-rays. (*Schrek:* September) 1055
Tissue culture—A study of the behavior in . . . of lymph nodes from Hodgkin's disease. (*Rottino, Worken, and Hollender:* May) . . . 669*
Topography of chronic gastritis in otherwise normal stomachs. (*Hebbel:* May) 721*
Torula—Pathogenesis of cryptococcic (. . .) meningitis. (*Terplan:* May) 711*
Transfer of immunity to the virus of St. Louis encephalitis to suckling mice through the milk, demonstrated by foster nursing. (*Smith and Geren:* May) 713*
True aneurysms of the mitral valve in subacute bacterial endocarditis. (*Saphir and Leroy:* January) 83
Tuberculosis—Pathogenicity studies of tubercle bacilli, type avium, from a human infection. (*Feldman, Hutchinson, Schwarting, and Karlson:* May) 696*
——Production of unilateral ulcerative pulmonary phthisis by quantitative natural airborne contagion. (*Lurie and Abramson:* May) . . 694*
Tuberculosis in rabbits induced by droplet nuclei infection: response to initial infection and to reinfection. (*Ratcliffe and Wells:* May) . . 695*
Tumors of the carotid body. (*LeCompte:* March) 305

Umbilical cord—Differential diagnosis in congenital syphilis of the . . . . (*Wanstrom and French:* May) 728*
Unexpected death in children with rheumatic heart disease. (*Hamilton, Tanner, Pebley, and Voorhees:* May) 707*
Unusual changes in lymphosarcoma under nitrogen mustard therapy. (*Hunter:* May) 670*
Uremia—The pancreas in . . .: a histopathologic study. (*Baggenstoss:* September) 1003
Urine—Observations in guinea-pigs following injection of specific hematopoietic substance derived from urines of human leukemic subjects. (*Sawitsky and Meyer:* September) 1117

Vascular proliferations, with features of **arteriovenous anastomoses,** in the sympathetic chain of hypertensive patients. (*Lattes:* January) 717

Virilizing hilus cell tumors of the human ovary with a review of ovarian hilus cells and evidence of their androgenic function. (*Sternberg:* May) 679*
Virilizing tumor—Histologic studies on a . . . of the adrenal cortex. (*Weber and Menten:* March) 293
Virus—Transfer of immunity to the . . . of St. Louis encephalitis to suckling mice through the milk, demonstrated by foster nursing. (*Smith and Geren:* May) 713*
Virus myocarditis. Pathologic and experimental studies. (*Schmidt:* January) 97
Vitamin C—Skeletal effects of estrogenic hormone in growing . . .-depleted guinea-pigs. (*Silberberg and Silberberg:* September) . . . 1019
Vitamin D—Metastatic calcification produced in dogs by hypervitaminosis D and haliphagia. (*Mulligan and Stricker:* May) . . . 451

Waterhouse-Friderichsen syndrome—Fulminating meningococcic infections and the so-called . . . . (*Ferguson and Chapman:* July) . . 763
Whipple's disease—Lipodystrophy intestinalis (. . .). (*Black-Schaffer, Hendrix, and Handler:* May) 677*

Xanthomatosis—Biliary . . . (xanthomatous biliary cirrhosis). *MacMahon:* May) 527
X-rays—Cytologic changes in thymic glands exposed *in vivo* to . . . . (*Schrek:* September) 1055
